Kelly's Picks Classic Microblading

Perfect brows, perfect look. Having the perfect eyebrows is what defines the quintessential modern makeup look. Expertly trained in Microblading, our talented owner, Kelly, will utilize her incredible sculpting skills to give you brows that will wow!

Microblading is a semi-permanent technique that enhances your natural eyebrows and can be used to create, reshape, fill in gaps, improve the arch, and even reconstruct their entire appearance. This specialized styling practice deposits pigment into the top layer of the skin which causes it to fade quicker than a permanent tattoo. Microblading is not a replacement for makeup, you will still need to fill in your brow. We will help you select the perfect brow pencil. Currently loving the Blinc Eyebrow pencil.

After your initial sessions, The Powder Room recommends having your brows touched up just once a year. How amazing is that? Let Kelly use her unparalleled skills to pamper your pretty self this month – transform your eyebrows into the arches of your dreams and wake up each day with the perfect brows!

Blinc Eyebrow Pencil Flawless Definition

Get back a little control in your life this spring with blinc and their multifunctional eyebrow pencil! This light, yet pigment-packed blendable formula will frame, structure, and enhance your eyebrows like nobody's business. Providing all-day smudge-proof wear, blinc's Eyebrow Pencil comes in three believable colors that complement any hair color or skin tone (dark brunette, light brunette, and blonde). Perfect for both thin and thick brows, this cruelty-free vegan formula is waterproof and has staying power that will get you through even your longest days. The precision tip and spoolie brush provide the ultimate control you need to expertly fill and define your eyebrows into glamorous arches. Get empowered with blinc and take back control of your brows today!

Karli's Korner Treatment Specials Ageless 24 Karat Gold Facial

Don't wait for the Olympics to get your gold this month – say goodbye to fine lines, dull skin, and dryness with our Ageless 24 Karat Gold Facial! Using the vaunted tech-filled MSB™, we start out with a full cleansing followed by exfoliation to remove any dull, dry, or dead skin cells. These two steps are essential to prep your skin for maximum product absorption! Next, Karli will use our Rezenerate Nano Pen to infuse the NEW X08 Cosmeceuticals Placenta Peptide Complex serum into your skin.

After the serum is needled into your dermis, the powerful and rejuvenating X08 Cosmeceuticals Placenta Stem Cell Jelly Mask is placed onto your pretty face. Once removed, 24 karat gold foils are then gently laid over your skin to push the hyaluronic acid, amino acids, nutrients, and antioxidants deeper into your skin. The gold itself is also said to improve the appearance of skin tone, redness, elasticity, wrinkles, dark spots, and hydration while also allowing better product absorption.

Finish your hour of luxury with the Celluma LED Light Therapy Mask to improve cellular health and further reduce signs of aging plus eliminate any acne. This precious metal facial will improve skin texture and overall appearance and is THE gold standard in skin care treatment!

During the month of March, book your 24K Gold Facial and receive a complimentary X08 Cosmeceuticals Stem Cell Eye Mask to take home and continue your results around the delicate eye area. These eye patches are infused with the same ingredients as the face mask applied during your facial and we all know that with mask wearing, your eyes are the feature that everyone sees the most. Enjoy this free gift while supplies last so make sure to book your facial today by clicking this link!
