

PV Welcome TO NAILS LOUNGE

CLEAN PEDICURE TUBS

We don't use regular whirlpool spa chairs for pedicures at PV Nails Lounge. Research shows that bacteria, skins, and harmful particules can gather up in the pipes and cause dangerous infections. Our spa pedicure chars are pipless and our pedicure tubs have disposable liners for each client's use, so there is no cleaning process after each use at all. Therefore, everytime you have a pedicure service at our nails lounge you do not have to worry if your spa chair was cleaned properly.

STERILIZATION

PV Nails Lounge keep sterilization as its number one priority. All of our tools are autoclaved or non-reusable. Autoclave, which is used widely in dental offices or in hospitals, is a sterilization process to sterilize all metal tools. For all non-metal tools, they are packed in individual packs and are non-resuable after each use. Everytime when you are serviced, a new pouch of sterilized tools are an individual package of tools will be open in front of you to guarantee the cleanness of our service.
